Key API Integrations:
1. Voice Processing:
Free:
Whisper (STT)
pyttsx3/espeak (TTS)
Paid (
0.006
0.006-0.02 per 1k chars):
ElevenLabs (best quality TTS)
PlayHT (alternative TTS)
Deepgram (low-latency STT)
2. Computer Vision:
```

| Free:                       |
|-----------------------------|
| YOLOv8 (object detection)   |
| MediaPipe (face/pose/hands) |
| Paid (\$1-5 per 1k images): |
| AWS Rekognition             |
| Google Vision AI            |
| Clarifai                    |
| 3. Natural Language:        |
| Free:                       |
| Llama 2 (local)             |
| Rasa (dialog)               |
| Paid (<br>0.002             |
| 0.002-0.12 per 1k tokens):  |
| OpenAl GPT-4                |
| Anthropic Claude            |
| Google Gemini               |
| 4. Biometrics:              |
| Free:                       |
| HeartPy (webcam PPG)        |
| OpenFace (facial metrics)   |
| Paid:                       |

| Empatica E4 API (\$1k+ hardware)   |
|------------------------------------|
| Biostrap API (wearable data)       |
| 5. Environment:                    |
| Free:                              |
| OpenWeatherMap (1k req/day)        |
| AirVisual (air quality)            |
| Paid:                              |
| Tomorrow.io (\$20+/mo)             |
| Google Maps Geocoding (\$5/1k req) |
